Enhance Your Advantage and Productivity with Capitaline

- Company Information**
Exhaustive information includes historical financial data at the schedule level, shareholding pattern, stock quotes and share pricing data spanning up to 10 years, corporate announcements, financial news, press releases and alerts.
- Screeners for better ideas**
The powerful interactive querying module allows searching companies based on different parameters including financial, qualitative, and event-driven criteria such as management changes, corporate guidance changes and insider trading.
- Build Models**
Analyze data efficiently with the help of customized Excel add-ins, models and presentation.
- Analytical tools**
A wide range of tools to undertake technical analysis and charting.
- Track market performance**
Access daily share price data, beta, standard deviation, stock return, moving averages, bulk and block deals and charts besides market snapshot of indices.
- Company & Industry Research**
Easier interface for benchmarking and peer comparison to analyze and compare company performance with industry.

The new internet version is launched which provides information on a far greater number of companies, additional data coverage and interactive querying facilities. No data installation and no updation hassles are some of the key advantages Capitaline AWS boasts of.

The development of Capitaline AWS is in response to a long standing demand of avid Capitaline users to upgrade the previous version's data viewing and query module to a more user friendly navigation and powerful querying options without any restrictions. The database is complemented with powerful analytical software tools to enable extensive querying and research. With Capitaline AWS, information access and research is effortless.

Some of the key highlights of New online version:

1. Screener Module: - New Powerful screener module with easy to use tools. No domain and Field Restrictions.
2. New Development (features/screens):- New – Features and data screens are up to date with new & improved interface. Data viewing is effortless with minimum clicks
3. Data backup:- New - No problem of restoring data in case of system crash.
4. Coverage:- Database Coverage has been increased in terms of number of companies, new Sectors/industries classification and Business houses.
5. Annual Report in PDF:- Latest three year Annual report in PDF is available for downloading for listed companies and private company annual report request automated.
